

Boral CE1

SPECIALTY PRODUCT

2018 EDITION

Product Description

- Boral CE1 is a clay thickened bitumen emulsion.
- Designed as an adhesive for insulation in the construction of cool rooms.
- Durable and sprayable.
- Based on very stable ASS bitumen emulsion meeting AS1006.
- Stable in storage and will not bleed in service.
- Available in 20 litre and 205 litre drums.
- Will act as a water and vapour barrier on walls, but is not designed for constant contact with water, such as water tank lining.

Preparation

- Surfaces to be coated should be clean and free from dust and oils.
- Thin the emulsion if necessary with clean, potable water.
- Stir contents of the drum adequately before application.
- Protect the drum from frost, as the product will break and be unusable if frozen.

- Clean tools while still wet with clean water.
- If material has set, tools may be cleaned with mineral turpentine.

Application

- Allow sufficient drying time between coats. Generally between 8-16 hours.
- Will give a black finish initially, but the surface will oxidise in sunlight over time.
- Generally, application rate is approximately 2 litres/m². Application rate may vary according to site conditions.
- Apply in layers 3mm thick, or shrinkage cracking may occur.
- Apply with a brush, or spraygun.
